Trimble DiNi Digital Levels

The Trimble DiNi Digital Level is a digital height measurement sensor designed for any job site where fast and accurate height determination is required. Use the Trimble DiNi for applications such as precise leveling of flat and sloping surfaces, establishing the vertical component of grade and grade profiles, subsidence monitoring and establishing the vertical component of control networks.

KEY FEATURES:

- Determine accurate height information 60% faster than with automatic leveling
- Eliminate errors and reduce rework with digital readings
- Transfer data to the office easily
- Measure to a field of just 30cm

The easy to use and accurate Trimble DiNi offers numerous features to maximize your productivity in the field. Available in two models – DiNi 0.3 mm per km or DiNi 0.7 mm per km. For more information on the DiNi Digital Levels please call and request.

Comes with a selection of bar code rods to choose from too.
