## TRIMBLE SCS900 SITE AND ROAD APPLICATION

**Course Description:** This course teaches participants how to use the SCS900 Site Controller Software and related office software utilities for the grade checker using GPS or Robotic Total Stations. Training equipment will include the following: SCS900 and a TSC2 data collector.

This course will cover surface measurements, as-builts, basic road stake out, stockpile quantities, layout, grade checking, UTS Set-up and Site Calibrations.

**Who Should Attend:** Site supervisors, foremen, and grade checker or layout person.

**Pre-Requisites:** Basic computer and Microsoft Windows Knowledge

**Required Student Materials:** Laptop, Scroll Point Mouse, and Calculator.

**Note:** Lunch will be provided. TSCe data collectors can only be upgraded to SCS900 Version 2.33. This software upgrade does not include the advanced measurement module or roading option.

For registration, please email [info@keypre.com](mailto:info@keypre.com) or contact KPI for more details .
