

## Trimble Construction LIVE

### The Power of Software

As technology evolves, it's more important than ever to be as efficient as possible on your jobsites. Join us at Trimble Construction LIVE to learn more about Business Center - HCE Powered by Trimble from a Trimble software expert.

This one-day event will give you first-hand knowledge of the benefits of adding technology to transform your work and make you more productive and profitable.

### Transform the Way You Work

Business Center – HCE is a fully integrated software solution that provides everything you need to prepare and manage data for heavy and highway construction projects. Use Business Center - HCE to create bids with expanded detail and sharper accuracy, while ensuring data is clean, up-to-date and delivered in the right format to get the job done.

- Digitize plan data as points, 3D lines, contours and pads
- Edit design data in plan or 3D views
- Generate reports that delineate the amount of top soil, bulk earthwork and other site improvement materials
- Manage data for machines and site positioning instruments
- Route data to and from controllers and field crews
- Track data and perform quality control
- Analyze site activity and productivity

By enabling a seamless flow of information from the field to the office, Business Center – HCE reduces costs and makes your projects more efficient.
